About
Petic International

Sheik Salah has been involved in global business, establishing various companies across the Middle East and Africa, and providing high-quality construction project and engineering services in the oil and gas sector.

Initially, the Petic International made significant investments in the Gulf States and Tanzania, focusing on building infrastructure and road projects. The group then expanded to manufacturing household and pharmaceutical products in Rwanda, as well as gas cylinders in Uganda. Currently, the Group is planning to represent Chinese car manufacturers by creating an assembly workshop in Africa.

Tanzania Investment:

East Trading & Manufacturing Company LTD
Kisutu Street 2423
Dar Es Salaam, Tanzania

East Trading & Manufacturing Company has been established in Tanzania to provide quality construction services to real estate contractors, construction companies, and the civil engineering and infrastructure industries. The company has built a successful track record based on its commitment to customers in the operations and construction domain.

With extensive experience in building services, East Trading Company is moving forward to undertake complex and challenging civil engineering and building projects. The company aims to extend its services from innovative technical concepts and front-end engineering design to long-term goals in construction management. This includes the installation, commissioning, and long-term operation maintenance of various projects in the construction sector.

The rapid growth of East Trading & Manufacturing Company is driven by its bold vision, strong entrepreneurial spirit, and commitment to customer satisfaction through the delivery of excellent quality products and services.

The company holds a portfolio of strategic investments in the construction sector, owning a substantial fleet of mobile equipment in the Gulf States and the East Africa region. This complements the company's multi-domestic growth strategy, which focuses its operational hubs in both regions.

About
Petic International

Our mission is to participate in and contribute to the development and enrichment of services in the Gulf States and the East Africa region. We aim to provide solutions for various communities in the construction sector by offering high-quality engineering services. The company is fully committed to looking after the interests of its customers, employees, shareholders, and communities, conducting its business ethically and profitably as a responsible corporate citizen.

To accomplish our mission, we continually:

- Enhance our competencies by leveraging the skills of qualified engineering professionals, fostering effective communication at all levels to improve the operating environment.
- Expand our presence in existing markets through fair pricing, meeting deadlines, providing quality products and value-driven solutions, and offering high-quality service through advanced and creative technological approaches, while consistently improving our operating systems.
- Energize our employees by promoting a culture that recognizes performance, values contributions, and celebrates successes.

Our Speciality

شركة "بتك العالمية" هي شركة قطرية رائدة ومتخصصة في مجالات النفط والغاز، حيث تركز على تصنيع وتطوير قطع الغيار والمعدات المتخصصة المستخدمة في آبار النفط والعمليات الصناعية المختلفة. ومن مقرها الرئيسي في دولة قطر، تدير الشركة عملياتها وتوسع نطاق أعمالها في عدة دول، مما يعكس قدرتها على تقديم حلول صناعية متطورة ومرنة تلبي متطلبات الأسواق المحلية والدولية.

تتميز "بتك العالمية" بخبرتها الفنية العميقة والتزامها بأعلى معايير الجودة والاحترافية، مما يجعلها شريكًا موثوقًا للعديد من الشركات العاملة في قطاع الطاقة. وتسعى الشركة باستمرار إلى تطوير منتجات مبتكرة وحلول فعّالة تدعم كفاءة العمليات وتعزز الأداء في قطاع النفط والغاز.

وبفضل فريق عمل متخصص ورؤية واضحة نحو النمو المستدام، تضمن الشركة تقديم منتجات وخدمات مطابقة لأعلى المعايير الصناعية العالمية، مع التركيز على التميز التشغيلي، الجودة، والابتكار في جميع مجالات عملها

Petic International is a leading Qatari company specialized in the oil and gas sector, focusing on the manufacturing and development of spare parts and specialized equipment used in oil wells and various industrial operations. From its headquarters in Qatar, the company manages and expands its operations across multiple countries, reflecting its ability to provide advanced and flexible industrial solutions that meet both local and international market demands.

Petic International is recognized for its strong technical expertise and commitment to the highest standards of quality and professionalism, making it a trusted partner for companies operating in the energy sector. The company continuously strives to develop innovative products and effective solutions that enhance operational efficiency and performance within the oil and gas industry.

With a specialized team and a clear vision for sustainable growth, the company ensures the delivery of products and services that comply with the highest international industry standards, while maintaining excellence, innovation, and operational reliability across all its activities.

Chase The Vision, Not The Money.

The Money Will End Up Following You.

Our Activity

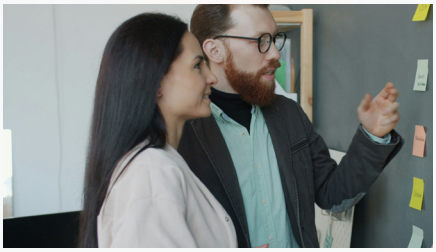
East Trading & its main Group Petic International projects and construction management services include: Early involvement during the feasibility and design development stages securing value engineering alternatives and full scrutiny of constructibility issues. Planning and coordination of construction activities and designs are deliverables in time to secure uninterrupted construction activities.

Our Specialties

PROJECTS & CONSTRUCTION
The East Trading & its main Group Petic International philosophy can be put into one simple formula can do! That is a promise we have been fulfilling over and over and that will remain the highest factor guiding our actions in future. We continually strive to improve our performance and to complete the Projects within the scheduled time, while maintaining standards of quality and safety during the execution.

Reliability

Every Facet of our comprehensive spectrum of service is governed by a high quality standard which make East Trading and Its Main group as a successful enterprise. The Group bring this standard to life on a daily basis by applying quality management, excellent safety practices and last but not least the customer-oriented synergy effects arising from our partnership.



Our Activities

1- CIVIL WORKS AND CONSTRUCTION

East Trading & manufacturing Company holds a portfolio of strategic investment in construction equipment; Property and a substantial fleet of mobile construction equipment in Tanzania. This compliments the Company's multi- domestic growth strategy which focuses on its operating hubs in Eastern African countries.

East Trading's heavy earthmoving equipment, skilled operatives and expertise in the work and Local environment have enabled the company to be involved in many important civil and construction projects in Tanzania. The company strive to provide the best solution to its dients, it has the depth of resources and solled sabour teams to take projects from concepts through construction, recognizing suggestions about improvements leading to that success. East trading and manufacturing company and its main group Petic International having already completed more than 77 projects of various sizes for private and public sectors worldwide.

The company and its main group operations are sweetly poised to take this commendable journey to its next level.

The capability in construction and the range of construction services offered by the group includes:

- Design and Construction Engineering
- Design-Build Projects
- Construction and Project Management
- Procurement of Materials and Equipments
- Manpower Supply and Personnel Services
- Facilities maintenance
- Concrete Repair and Water Proofing

Our Activities

2- ROADS CONSTRUCTION

East Trading & Manufacturing Company has worked hard to maintain its reputation in the construction quality of asphalt road and highways it has successfully completed a range of large-Scale road projects from large highways, to small commercial site developments, the company approaches every project with dedicated efficiency, technology, and specially focused on the safety.

The Company performs all phases of road constructions, including earthwork, utilities, drainage, concrete and asphalt, paving, bridges construction, as well as aggregate productions What makes the company special is not just its versatility, as the fact, the company undertook many public and private sectors projects, worth of multi-million dollar, enabling the group to operate with honesty, Integrity and higher standards.

FEATURED SERVICES OVERVIEW

- Equipment Services.
- Civil Construction & General Contracting.
- Electrical, Air-Conditioning Installation and Plumbing
- Architectural Finishing Works
- Renovation & Refurbishment of Residential Complexes Commercial Buildings and Industrial Facilities
- Water Supply, Sewage, Electrical, Telecommunications & CATV Infrastructures and Networks

Road Project
Road | Bridges | Asphalting

Road Project
Road | Bridges | Asphalting

Transport
Equipment Project

- Civil Work
- Construction Roads
- Construction & Maintenance Services
- Rental

A list of Heavy Equipment available on Contract or Rental basis:

- Crawler Tractor & Dozer
- Excavators
- Graders
- Wheel & Track Loaders
- Compaction Equipment
- Dump Trucks
- Water Trucks
- Asphalt Paver
- Asphalt Mixer
- MC Distribution Truck
- Cranes
- Forklifts
- Side Booms
- Trailer Tractor
- Flat Bed Truck
- Low Bed Truck
- Welding Machine

Equipment Project

Our Specialties

Petic International holds a portfolio of strategic investment in construction equipment property and a substantial fiee of mobile plant in Saudi Arabia. This compliments the Company's multi-domestic growth strategy which centers on its operating hubs Al-Khobar, jubail, and QATAR.

PROJECTS

The Petic International philosophy can be put into one simple formula - can do! That is a promise we have been fulfilling over and over and that will remain the highest factor guiding our actions in future. We continually strive to improve our performance and to.

MISSION

Oil-rigs or refineries, power stations or steel mills, piping, mechanical, construction whatever the project, we can develop our involvement in those areas which allow our clients to take a back seat. Why? Because they know that everything which is or could be important.

THINK

Only if you plan with a good degree of foresight can serious mistakes be avoided. Foresight is a given at Petic International.

RELIABILITY

Systematically achieving the optimum: it is not without reason that Petic International is one of the companies that are able to document their competence in black and white for the benefit of our customers. Our strategies, structure and systems have been focused on creating constant customer satisfaction by delivering our customers with the services, solutions and products that are qualitative and cost effective.

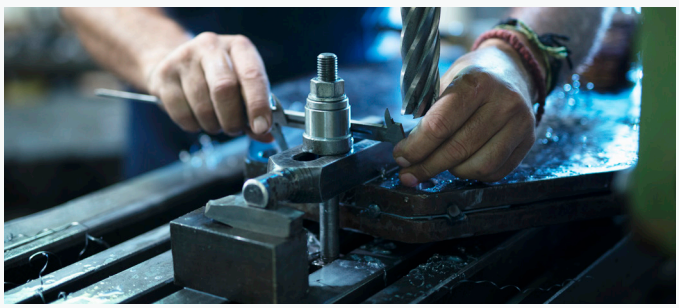
Asset Integrity

One of the major challenges facing the oil and gas industry today is to ensure the safe operation of their ageing assers. Asset Integrity entails making sure an asset can perform its required function effectively and safely. Mega Asset Integrity has a well trained and experienced team who certified to API (510,570,580,6531CSWIP Welding & Painting, NACE and ASNT-UT, RT.MT.PT, VT In Addition to: Specialized Tools & Equipment.

Mega is accredited by the Egyptian Accreditation Council (EGAC) the 150/IEC17020: Certificate for Type C inspection Bordy in the field of in service inspection:

Special
Service

Mega has its dedicated team for special service activities. Team members are multi-disciplined engineers and technicians with hands-on experience in this field, they are familiar with all safety procedures and can easily adopt to different customers HSE regulations. The team is well equipped and it is also highly mobile and can be mobilized on short.



Our Projects

Khunsaniyah Gas Plant includes two gat-conditioning trains, ethane and natural gas liquids recovery units process 1000 MMSCFD of natural gas, produce 550 MMSCFD sales gas, 240.000 BL Dethane/Natural gas liquids, and 1,800 metric tons/day sulfur.

PETROCHEMICAL PLANT

CCR AND ISOMERIZATION UNITS

Project Duration: 21 months

Participation: QA/QC Manager & Site Manger

Scope Construction Works

- 20.000 m3 concrete pouring
- 4.200 tons steel erection
- 7.500 tons equipment installation
- 6.000 tons piping prefabrication and erection work
- 347.000 m2 painting works
- 68.000 m2 insulation works
- All pre commissioning activities and site assistance to commissioning team

Our Projects

Fabrication Workshop

Workspace

- Workshop Floor Space 24,200 sq.m Fabrication
- Workshop (100x30) 3,000 sq.m
- OpenVII: If1 shop (30x30) 900 sq.m Vertical Tank
- Workshop: (20x50) 1,600 sq.m Sand Blasting
- Workshop (30x15) 450 sq.m
- Storage Area: 4,500 sq.m Administration 600 sq.m

Oil & Gas / Industrial Fabrication Works

- Steel Work 3000 tons/year
- Hanger Workshop Hand rail Platform
- Pipe racks Skimmers Stacks Skids
- 2-Plate Work 300 tons/year
- Pressure Vessel Horizontal Tank Air
- Cooler Headers Silos
- Filters Separators Gas Scrubber
- Liquid SealOrum KO.Drum Flares
- 3-Piping work 24000 O. Near
- Piping Spools Piping Skids
- 4-Vertical Tank 300 TonNear Storage
- Tank 1000 bbl Storage Tank 500 bbl
- 5-Shelter 50 TonNear Offshore Shelters
- Endosures
- Porta Cabin

Other Services

- Supply of Container
- Houses Drilling Spare
- Parts & Service
- Material Supply Services
- Custom Clearance
- Catering

Material
Supply Service

Petic International is a well-resourced and full-service oilfield supply company serving the Oil & Gas Industry in the country. Our clients include major Oil and Gas Companies, Projects and Contractors in Yemen. Our company has associations with renowned manufacturers, major mills and suppliers across the World.

Petic International is an oilfield supplier you can trust for any urgent and important Oil & Gas project supply. Operations are conducted from purpose-built facilities in Yemen, comprising of offices. workshops, warehousing and covered storage areas, and from where a wide range of products and services covering a large spectrum of the energy industry are supplied. Products range from materials required for the drilling of wells to equipment required for large downstream projects.

Petic International Stocks and Supplies are committed to client satisfaction in every aspect of our business. Guided by our core values of integrity, teamwork.

MATERIAL FOR OIL & GAS

Reduce Tee

Our Reduce Tee fittings are designed to provide efficient flow distribution between pipes of different diameters in industrial piping systems. Manufactured with high precision and durability

180º Elbow

Engineered to ensure complete flow redirection while maintaining system integrity and operational efficiency.

90º Elbow R=3.0D

Designed to provide smoother flow transition with reduced turbulence and pressure loss.

Common Forged Flange Materials:

Carbon Steel: A105, A350 LF2 / LF3 | **Stainless Steel:** A182 F304, F304L ... | **Duplex / Super Duplex:** A182 F51 (UNS S31803 / 2205) ... | Alloy Steel: A182 F11, F12, F22 (1.25Cr-0.5Mo / 2.25Cr-1Mo)...

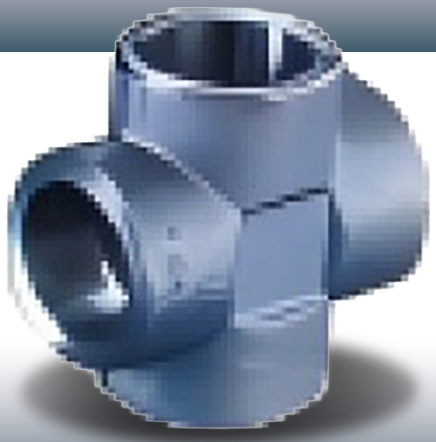
Other products within our range:

Straight Tee, Straight Cross, 90º Elbow, 45º Elbow, Eccentric Reducer, Eccentric Reducer, Eccentric Reducer, Concentric Reducer, Concentric Reducer, Flanging Nipples

MATERIAL FOR OIL & GAS

45º Socket Elbow

High-quality Socket Elbows designed for secure and efficient directional changes in industrial piping systems. Built according to international standards.



Socket Cross

Engineered to provide reliable multi-directional flow distribution in complex piping networks. Combining precision manufacturing with robust material quality.

Single End Coupling

Premium Single End Couplings designed to deliver strong and dependable pipe connections for industrial piping systems. Manufactured for durability and operational reliability.

Common Forged Flange Materials:

Carbon Steel: A105, A350 LF2 / LF3 | **Stainless Steel:** A182 F304, F304L ... | **Duplex / Super Duplex:** A182 F51 (UNS S31803 / 2205) ... | Alloy Steel: A182 F11, F12, F22 (1.25Cr-0.5Mo / 2.25Cr-1Mo)...

Other products within our range:

45º Socket Elbow, Socket Tee, Single Socket Coupling, Double Socket Coupling, Pipe Socket, Female Thread Coupling, Socket Union, Threaded Elbow, Threaded Union, Weldolet

MATERIAL FOR OIL & GAS

Weld Neck Flange & Slip On Flange

We manufacture and supply a complete range of industrial flanges designed for reliable and high-performance piping connections across oil & gas, petrochemical, energy, and process industries. Our product portfolio includes Weld Neck, Slip-On, Blind, Socket Weld, Threaded, Lap Joint, and other custom flange types produced according to international standards. Engineered for strength, precision, and corrosion resistance, our flanges ensure secure sealing performance and long-term durability under demanding operating conditions.

Common Size Range of ASME Forged Flanges & Fittings (Standard English Version)

1 Forged Flanges: ASME B16.5 | Nominal Pipe Size: NPS 1/2” ~ 24” | Pressure Class: 150#, 300#, 400#, 600#, 900#, 1500#, 2500# | ASME B16.47 (Series A / Series B)| Nominal Pipe Size: NPS 26” ~ 60” | Pressure Class: 150#, 300#, 600#, 900#

2. Forged Fittings: Forged Socket Weld & Threaded Fittings (ASME B16.11) | Size Range: NPS 1/8” ~ 4” | Pressure Class: 3000#, 6000#, 9000# | Forged Welded Fittings (ASME B16.9) | Size Range: NPS 1/2” ~ 48” | Wall Thickness: SCH 40, SCH 80, SCH 160, XXS | Branch Outlet Fittings (MSS SP-97)| Size Range: NPS 1/8” ~ 36”| Pressure Class: 1500# ~ 9000#

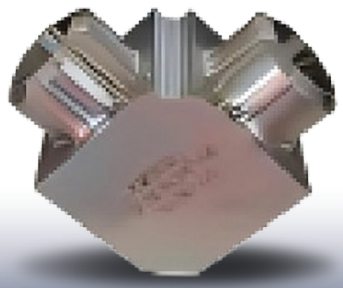
Common Forged Flange Materials:

Carbon Steel: A105, A350 LF2 / LF3 | **Stainless Steel:** A182 F304, F304L ... | **Duplex / Super Duplex:** A182 F51 (UNS S31803 / 2205) ... | Alloy Steel: A182 F11, F12, F22 (1.25Cr-0.5Mo / 2.25Cr-1Mo)...

Other products within our range:

Threaded Flange, Blind Flange, Socketweld Flange, Plate Flange, Spectacle Blind Flange, Loose Flange

MATERIAL FOR OIL & GAS

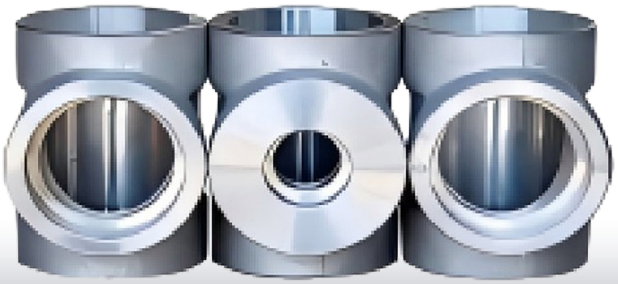


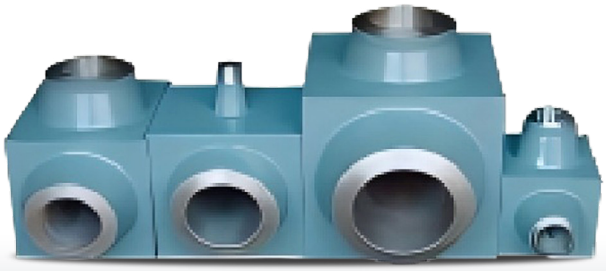
Forged Elbow

Our Forged Elbows are manufactured to deliver dependable performance in critical piping systems requiring high mechanical strength and precision.

Socket Tee

We provide Socket Tee fittings developed for efficient branch connections in industrial piping networks. Manufactured with strict quality control and precision engineering.





Forged Eblow

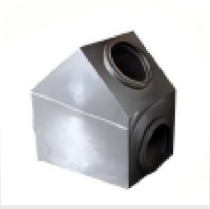
Engineered for heavy-duty industrial use, our Forged Elbows combine robust construction with high resistance to corrosion and mechanical stress.

Common Forged Flange Materials:

Carbon Steel: A105, A350 LF2 / LF3 | **Stainless Steel:** A182 F304, F304L ... | **Duplex / Super Duplex:** A182 F51 (UNS S31803 / 2205) ... | Alloy Steel: A182 F11, F12, F22 (1.25Cr-0.5Mo / 2.25Cr-1Mo)...

Other products within our range:

Forged Inclined Tee, Forged Elbow, Forged Elbow, Forged Inclined Tee, Forged Inclined Tee



MATERIAL FOR OIL & GAS

General Pressure Transmitter

The QYBl00 series use diffused silicon pressure sensors as sensitive components and adopts fully digital circuits. The overall performance is stable and reliable, and can carry out long-distance signal transmission. All stainless steel structure, easy to install. It has extremely high anti-interference and impact resistance .It's suitable for gas, hydraulic, environmental protection, medical and other industries.

Range: -0.1-0-100MPa
Output: 4-20mA, RS485 0-5V, 0-10V, 4-20mA+HEART
Accuracy: 0.075%F.S, 0.1%F.S, 0.25%FS, 0.5%F.S

Compact Pressure Transmitter

QYBlOl is equipped with ceramic sensor and stainless steel 304 case, pressure transmitter is specially designed for small and medium equipment applications such as booster pumps and air compressors. It is also applicable to a wide range of industrial applications, with a variety of structures and output to meet the requirements of most applications. QYBlOl is designed with compact structure which especially applies to the installation in small space.

Range: 0-5MPa
Output: 4-20mA, 0.5-4.5V, 0-5V, 0-10V
Accuracy: 0.1%F.S, 0.5%F.S

MATERIAL FOR OIL & GAS

Hydrostatic Liquid Level Transmitter

Diffused silicon sensors are used as sensitive elements and all-digital circuits. The overall performance is stable and reliable, and can carry out long-distance signal transmission. All stainless steel structure, easy to install. It has excellent anti-interference and impact resistance and is suitable for well water, lake water, water tank.

Range: 0-400m
Output: 4-20mA, RS485, 0-5V, 0-10V
Accuracy: 0.25%F.S, 0.5%F.S

Split Liquid Level Transmitter

The liquid level transmitter adopts imported sensor pressure sensitive components, uses computer laser resistance adjustment for temperature compensation, and adopts an integrated junction box design. It has special wiring terminals and digital display, making installation, calibration and maintenance easy.

Range: 0-400m
Output: 4-20mA, RS485, 0-5V, 0-10V
Accuracy: 0.25%F.S, 0.5%F.S

OLED Pressure Switch

The main functions ofOYK300 intelligent pressure switch include4-20mA transmission output, two PNP switching outputs, and on-site display function. Using SMT technology and integrated design concept, it can provide constant voltage excitation and constant current excitation for the sensor. Its built-in microprocessor realizes adjustable settings of zero point, full scale, decimal point, control point and current setting through three-but· ton programming., without any potentiometer adjustment. The whole machine is suitable for industrial-grade temperature environments and has strong anti-interference.

Range: -0.1-0-100MPa
Output: M12-5P, 4-20mA
Switch Type: PNP

MATERIAL FOR OIL & GAS

General Pressure Transmitter

QTBlO0 is widely used in petroleum, chemical engineering, metallurgy, power station, hydrology etc. Industrial platinum resistance thermometers and thermocouples are used as temperature sensors and are usually used in conjunction with display instruments, recording instruments and electronic regulators. The sensors can directly measure the temperature of liquid, vapor and gaseous media and solid surfaces in the range of-200 0c~200°c in various production processes.

Range: -200-400ºC
Output: 4-20mA, RS485, 0-5V, 0-10V
Accuracy: 0.25%F.S, 0.5%F.S

Compact Pressure Transmitter

QTB101 could transmit electronic signal to displayer, recorder, DCS etc, widely used in industry, Science Institute. It is essential for gather and distribute system and digital date-bus transmission.

QTBlOl armored temperature sensor measures the temperature of the measured medium by using the feature that the resistance of the platinum resistor changes with temperature and shows a certain functional relationship. It adopts imported high-performance, high-reliability plati-num resistance. It is easy to install and has extremely high vibration resistance and shock resistance. It can directly measure the temperature of liquid and gaseous media in the range of -200°C~l600°C in various production processes.

Range: -200-1600ºC
Output: 4-20mA, 4-20mA+HERT
Accuracy: 0.25%F.S, 0.5%F.S

MATERIAL FOR OIL & GAS

Electromagnetic Flowmeter

QFM402 Electromagnetic flowmeter is based on Faraday's law of electromagnetic induction, measuring the volume flow of conductive liquid. It mostly consists of sensor and transducer, convertting the flow rate of the measured liquid in the pipe linearly into a current signal. In particular, the volume flow of strong corrosive liquids ,such as strong acids and alkali, and uniform liquid-solid two-phase suspended liquids such as mud, pulp and paper pulp can also be measured.

Measure Range: 0.3-12m/s
Switch Type: Split, Intergral, Plug-in
Normal Pressure: 4MPa, 1.6MPa, 1.0MPa, 0.6MPa

Vortex Flowmeter

QFM403 Intelligent Vortex flowmeter is a kind of velocity flowmeter.Based on Karman vortex theory, it uses piezoelectric crystal to detect the vortex frequency generated by the fluid passing through the triangular column in the pipeline, so as to measure the flow rate of the fluid.It has features of not only excellent anti-vibration performance, zero drift , high reliability,but not contact with the medium and so on.

Diameter: DN15-DN160
Structure Type: Flange, Thread, Clamp, Plug-in
ANormal Pressure: 1.6MPa-4MPs

Thermal Flow Switch

QLK400 is a flow transmitter with switch which could do real-time monitoring of liquid in the pipeline and it shall show the flow condition by several LED displayers. It can monitors following conditions: Flow speed increasing or reducing. medium exists or not, the medium is moving or not. It is used to protect idling pump and monitor the flow rate in the pipeline.

Measure Range: Water: 1-150cm/s Oil: 3-300cm/s
Switch Type: Replay, PNP
Probe Rod: 15mm, 18mm, 40mm, 60mm

MATERIAL FOR OIL & GAS

MATERIAL FOR OIL & GAS

Upstream Well Serves Chemical Solutions

- Cementing
- Stimulation
- Fracturing
- Coil Tubing & Pressure Pumping
- Enhanced Oil Recovery

Upstream Production Chemical Solutions

- Demulsifer. Corrosion Inhibitors
- Flow Assurance
- Scale Inhibitors
- Biocides
- HS2 Scavengers
- Oxygen Scavengers
- Sourgas Treatment

Downstream Process Treatment Chemical Solutions

- Water & Process Treatment
- Refinery Process Treatment
- Refinery Gas Treatment
- Reverse Osmosis & Sea Water
- Waste Water Treatment
- Effluent Water Treatment
- Utility & Process Treatment

Manpower
Consultancy

Our personnel are our true and most valuable asset, motivated workforce is our passport to success. We succeeded to gain the trust of our clients and managed to expand our database of specialized and professional staff of all disciplines including Nationals & Expatriates to fulfill client needs. The experienced and high qualified personnel are one of the main assets and means to fulfill our client requests.

Maintenance
Service

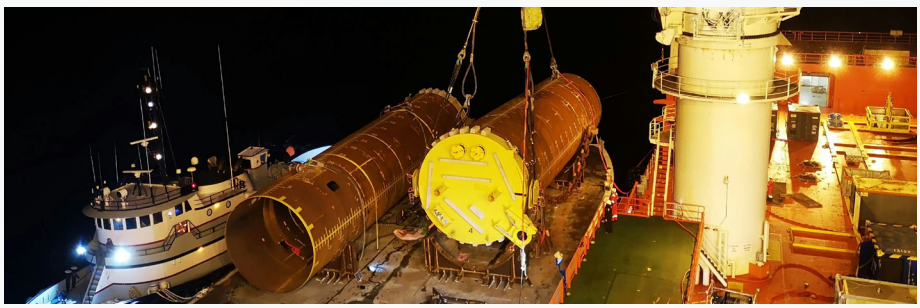
Petic International with Association with Major international companies provides scalable, integrated maintenance resources and services during a facility's lifecycle in any location in Yemen

We offer a wide range of global maintenance services. For optimal flexibility, we offer integrated maintenance solutions to fit your individual requirements. We work with you to develop a commercial model to accomplish your business goals.

Our first priority is always safety. At every level of our organization, our HSE Management system provides us with a dynamic platform for delivering continuous improvement in our safety performance. This is backed up by a combination of dedicated services, in-depth technical excellence, and a passion for unraveling complexity that makes us your ONE partner for life.

Offshore
Maintenance

Recognizing the strategic significance of obtaining a share of the offshore business. Mega has been successful in penetrating this market goal driven by the experienced human resources for this service



Our Projects

Rehabilitation & Maintenance Activities for Offshore Asset Assurance Management Solution

- Cleaning, blasting and painting for platforms structure and deck
- Supply, fabricate and install the safety net, ladders, handrails, etc...
- Supply, fabricate and install for boat landing, barge pumper, rubber fender and riser guard
- Supply, fabricate and install fire fighting network on platforms
- Modify, fabricate and install new deck extensions
- Supply and install of navigation system
- Flushing, cleaning and tightening service

IMR Program “inspection, maintenance, repair”, survey activities, inspection & survey

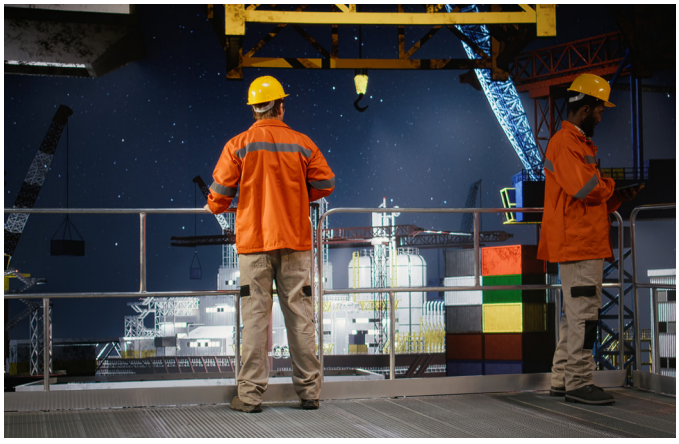
- Pipeline inspection (UT, GVI, CVI, CPM, Pipeline assessment)
- Internal pipeline inspection by tethered tool... weld and pipe scan
- NOT inspection for vertical structures and risers
- ROV inspection service
- Inspect painting condition
- Pipeline survey (Side scan, pipe tracker, sub bottom profiler)
- Geophysical and geotechnical survey
- Assistant injack up mooring and positioning

Repair & Maintenance

- Near shore pipe line replacement repair
- Installing free span supports under pipe lines
- Debris removal
- Installing clamps and anodes for steel structure & pipelines
- Splashzone coating repair and maintenance
- Blasting and painting for tanks (inside and outside)
- Cutting and welding UFW
- Decommissioning of monopod, tripod, etc...
- Submarine cable root survey and laying

Offshore maintenance & inspection activities for mooring buoy

- General visual inspection and video survey to identify any damages, corrosion or dent for all subsea components
- UT wall thickness measurement
- Inspect physical status of cathodic protection (depletion, fixation, remaining affective)



Onshore
Maintenance

We provide an integrated maintenance service (Global Maintenance), utilizing the latest maintenance techniques and best practice to cover the complete package of our client's facilities such as equipment tools, buildings, etc.. through long term contracts controlled by Pre-set KPIs (availability. reliability, HSE, etc.) to ensure the optimum performance of maintenance implementation.

The Team
Capacities & Qualification

Well trained and certified maintenance team who have gained the various maintenance technologies by dealing handling adversity of process types in oil, gas LNG etc... with its related operation techniques and safety hazards inside and outside oil and gas sector for railways, industrial sectors etc.

Onshore Service Scope

- Maintenance engineering
- Maintenance planning (CMMS) and implementation
- Execution of maintenance programs (corrective, preventive and predictive) for electrical instrument, mechanical, static equipment
- Major equipment overhauling and tum-around
- Execution of upgrading, expansion and modification to existing facilities
- Material Management and stock control.

Our
Continuous work

Electrical works, Instrumentation works Painting Insulation, Painting Insulation, HVAC

Testing, pre-commissioning and assistance of commissioning.

Having already completed a decade in the construction business, we Petic International had the opportunity to work on a diverse range of projects in the past. Handling these projects have immensely helped us in collecting a high degree of expertise on the various aspects of this business, and today, we can boast of handling an umbrella range of services for our clients.

We provides Services for the following:

- Production operations & maintenance
- Mechanical, instrumentation & electrical modification
- HSE & emergency management

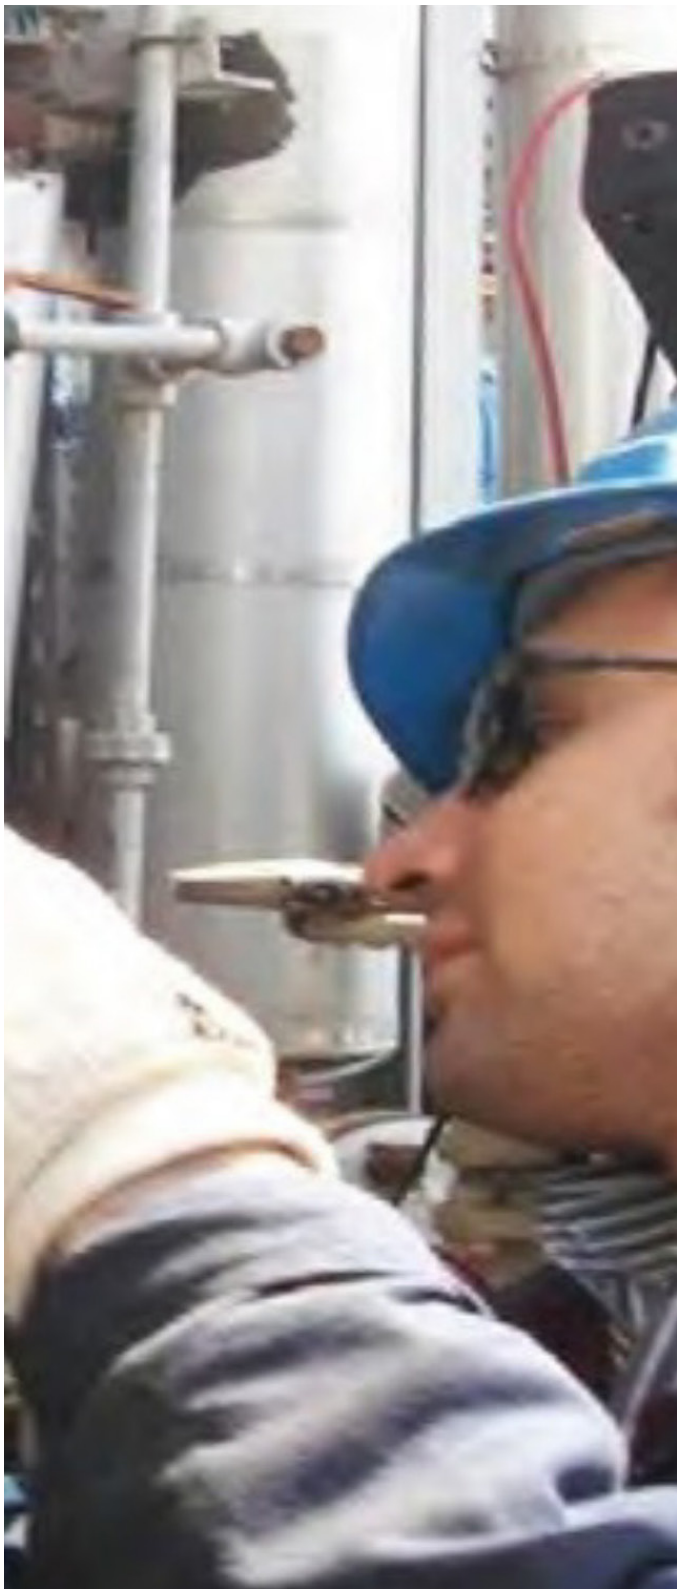
Electrical, instrumentation & communication

Mega has built a specialized and highly competitive Electric, Instrumentation & Communication. Team providing Construction, Maintenance and Modification Activities inside and outside the Oil and Gas Sector.

Mega has gained an enviable reputation through innovative solutions, quality services, competitive prices and reliable and timely completed projects.

Static equipment rehabilitation

Mega has a significant market share as a unique service provider for Boilers & Heaters Revamping Separators Fabrication & Heat Exchanger in oil & gas fields for water/fire tube boiler revamping, supported by a specialized workshop specifically for such kind of services complying with ASME Code.



Chemical Cleaning

Mega applies an advanced methodology by flowing cleaning chemicals circulated in a closed loop to ensure no leak or Contamination to the surroundings .Additionally, the chemicals used are non-toxic, non-flammable, non corrosive & environment friendly that dissolve and remove the deposits only, and have no effect whatsoever on the substrate of the equipment, thus it is considered the appropriate safe choice to project the integrity and safely of the assets.

Early Production

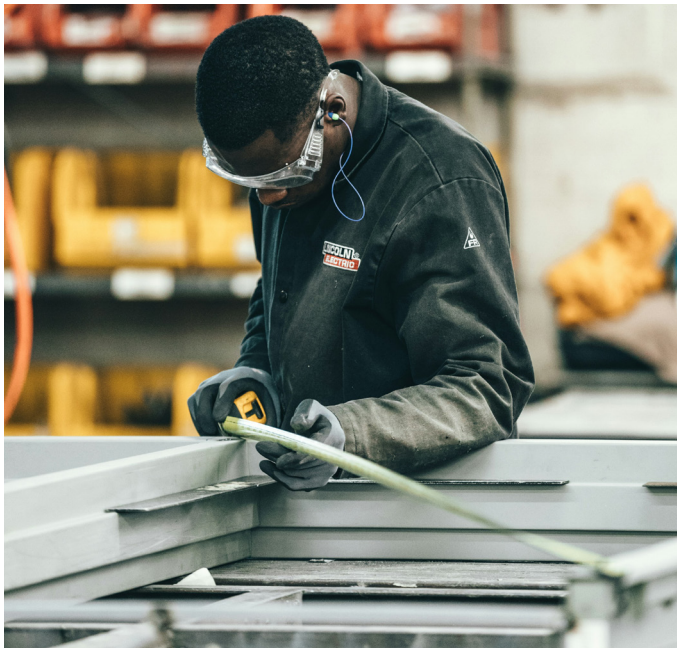
Early production facilities and fast-track product on systems enable Mega's clients to create early cash now with minimum cash outlay. They also provide real-time product on data that enables our clients to appraise reservoir performance before installing permanent facilities.

Hot Tapping

Hot tapping or pressure tapping,is the method of making a connection to existing piping or pressure vessels without the interruption of emptying that section of pipe or vessel. This means that a pipe or tank can continue to be in operation whilst maintenance is being done to it. The process is also used to drain off pressurized casing fluids.

Tube Bundle Puller Machine

New sophisticated equipment specialized in handling the tube bundles of heat exchangers. The machine is 3rd unit in Egypt and 1st among specialized maintenance companies. The puller is pioneer in its capacity as it is designed to handle heat exchangers Bundles up to 12 meter long, 2 meter diameter and weight up to 35 ton.



Scaffolding, Painting & Insulation (SPI)

Mega has its dedicated team for Scaffolding, Painting & Insulation Team Members are multi disciplined certified engineers and technicians with hands-on experience. They are familiar with all safety procedures and can easily adopt to different customers HSE regulations. The Team is well equipped with all necessary tools, and could be mobilized on a short notice to any location.

Scaffolding

Mega have their own suspended mobile scaffolding system, modified by Mega to be matched with the international HSE regulation and certification requirements to carry out all scaffolding types following own scaffolding procedures which based on the international specifications (BS,OSHA, EN). Mega has standard scaffolding material tested,inspected and matching with the international standards. All manpower are well selected, trained, highly qualified and certified, in addition to internationally certified scaffolding inspectors (CITS).

Painting

Mega painting team, are capable to deal wtih all type of painting material, painting procedures and follow up the most specific specification for new type of reconstruction or maintenance specialisation plants.

Insulation

Mega team have their own mobile work shops, including all required fabrication tools, machine and equipment. Mega manpower is very selective, high experience, competent. trained and highly qualified. Mega insulation team is updated with last international specifications. system and they are capable to deal with any international standards and procedure. Mega insulation team is capable to call)'out any volume of work during SID, normal maintenance or new construction.

EPC (Engineering -Procurement Construction)
